

Moss wall with plant highlights

Our moss wall with plant highlights impresses with a unique 3D effect! The moss wall consists of forest and pole moss, formed in gentle hills and complemented with an extraordinary variety of different plants. Our highlight: The rose from Jericho, which becomes the latest member of styleGREENs plant portfolio. This design was created for all those who appreciate a more subtle plant design!

Moss Wall with Jungle trails

Our Moss Wall with Jungle trails is the perfect combination of moss and plants! The islands of plants are arranged crescent-shaped, in different variations: facing each other, slightly shifted or turned away from each other. No matter which one you choose, you can be sure that each arrangement is a unique nature experience in itself. As a highlight plant, the fern serves as a connecting element between the individual islands, creating natural plant paths on forest and pole moss.

Jungle

Jungle feeling XXL! Our new individual design arrangement, "Jungle," is distinguished by all plants' natural growing direction. This makes the jungle look very natural and provides an even more intense jungle feeling! As a special eye-catcher, our florists work with various extraordinary plants, such as Phoenix, Washingtonia, or Aralia leaves, which significantly ameliorates the overall picture.

Possible uses for jungle walls:

The styleGREEN jungle walls fit in private or office rooms and in the foyer of public buildings. Thanks to their sound-insulating effect, they create an oasis of calmness and give you the feeling of being far away from stress and deadlines.

The colors of the jungle plants change from light green to dark green and blue-green. According to your unique ideas, we design your jungle wall and integrate selected accent plants, which intensify the jungle feeling even more! Due to the remarkable preservation process, the plants do not need to be maintained, so there is no watering or dusting, and therefore no follow-up costs.

Bring a piece of nature into your everyday life with the fresh green of your individual jungle wall and enjoy the time out - whether in the office or at home!

Possible applications of moss walls with preserved plants:

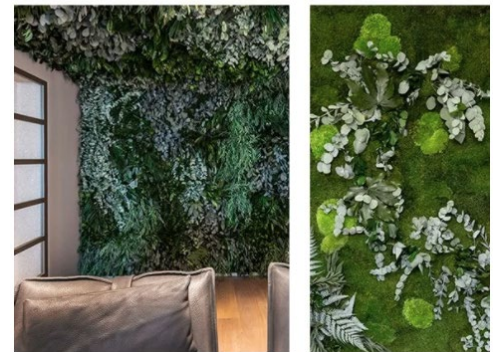

Our moss walls with plant highlights or jungle paths can be used in many ways and create a refreshing forest and vacation atmosphere in bedrooms, living rooms, and public buildings.

The various plant species and color shades can be combined according to your wishes and requirements. Thanks to an unique preservation process, the plants do not require any care, they do not need light or water, so there are no follow-up costs.

Furthermore, there is one thing our plant designs all have in common: Whether as sound-insulating wall cladding for the office or as a vertical garden in your own four walls:

Beautiful forest and globe moss with selected plants take you on a trip into nature with us - day after day! Each of our individual designs was created together with the European Champion of florists, Nadine Weckardt, according to the concept of Biophilic Design.

We want to give you the opportunity to bring nature into your life and enhance your well-being, creativity, and productivity.
